

Custom logo design completed in Adobe Illustrator.

App creation completed in Figma.

The customer is a kidpreneur. I had full range on this project. The customer is currently taking orders via email only. She was recently featured on a YouTuber page that has over 100k followers. Many requests are being received, but the client is unable to keep up with the demand via email. I will purchase the domain, create the website, mirror the app and social media content.
